

MY 90-DAY MILESTONE COMMITMENT

WHY THIS WORKS — THE PSYCHOLOGY TOOLKIT BUILT INTO THIS SYSTEM

- **Implementation intentions**
Each month page ends with an 'If X happens, then I will Y' line — pre-deciding your response to obstacles roughly doubles follow-through (Gollwitzer).
- **Loss aversion / streaks**
An unbroken row of crossed boxes creates a visible 'streak' you don't want to break — the same wiring behind habit-streak apps, just on your wall.
- **Public commitment**
Signing Step 2 and naming an accountability partner activates social commitment — people are far more likely to follow through on stated, witnessed goals.
- **Small, visible rewards**
Page 5 has a reward ladder — pairing each milestone with a small celebration reinforces the behavior via positive feedback, not just willpower.
- **Weekly review**
A 13-week reflection strip on page 5 forces a regular 'did I move forward' check — catching drift early instead of discovering it in week 10.

"A goal without a date is just a wish." — Fill this page in before you tape up the trackers.
